Smart System

ABOUT US

Mohrah Smart proudly stands in Saudi Arabia with projects all over the kingdom providing its fine services in Networking, Automation, Security, and in education smart tools with test that gain more than 30 years of confident and experience to provide more than what was expected.

We understand the different needs and different background of each client and we strive to assure him the best with no compromising.

MOHRAH
Systems

WHAT WE DO

Solution one

Deliver advanced home automation system that involves automatic controlling of home appliances through the use of different technologies and controllers such as control4 over laptops, smartphones or tablets or even remotely through wireless communication.

Solution Two

Mohrah Smart provide CISCO Switching & Routing for commercial building, network design and implementation for commercial building, fiber connection and installation, server, cabinet, IP Telephony, and many more.

Solution Three

To protect family and home, Mohrah Smart provide home security system solutions.

MOHRAH

Smart System

VISION

To be the foremost and superior quality solution provider.

MISSION

To deliver outstanding and distinctive smart home automation, networking, and security system solution.

MOHRAH

S

OUR TEAM

Because we believe that human resource in any firm is a keystone of its success, we insisted on hiring the best without compromising.

Mohrah Smart stands proudly with its team personnel. They are chosen carefully to enhance the company and business efficiency. Also to those personnel who are willing to share the responsibilities we count them as our partner.

And in order to assure the best service to our client, we always treat our team as family based on our deep belief that the way we treat employees is the way our team will treat.

It doesn't make sense to hire smart people and tell them what to do; we hire smart people so they can tell us what to do.

HOME AUTOMATION

Making your appliances convenient and energy efficient.. !!

MOHRAH

Smart System

Centralized and automatic control of home appliances including but not limited to buildings heating, ventilation, air conditioning, lighting, and other systems over smart phones, tablets, and laptops.

Helps in improving occupant comfort, the efficiency of building systems, and to reduce energy consumption and operating costs.

Make it possible to control things like temperature, lighting, and even security systems of your home with the swipe of a finger, touch of a screen, and the sound of your voice.
